Program Title
Environmental Dynamics, Master of Science

Program Delivery
Method
On Campus

Is this program interdisciplinary?
Yes

College(s)/School(s)

College/School Name
Graduate School (GRAD)

Does this proposal impact any courses from another College/School?
No

What are the total hours needed to complete the program?
30

Program Requirements and Description

Requirements
The candidate for admission to graduate study in Environmental Dynamics must satisfy the requirements of the Graduate School and have the approval of the Administrative Board. The student must have a B.A. or B.S. in a
related field and submit the following information:
Three recommendations from individuals familiar with the applicant’s academic or work history who can give candid assessments of the applicant’s ability to perform at the graduate level.
A Statement of Purpose outlining the applicant’s plans for the ENDY degree program that includes relevance of previous academic or work experience, current research interests or employment that bear on graduate level research, special skills, fieldwork experience, familiarity with interdisciplinary work (if any), and future career goals.
An example of the applicant’s writing such as a publication reprint, report, major term paper, undergraduate honors thesis, or similar document that demonstrates the applicant’s organizational skills, research ability, familiarity with a body of literature, ability to report clearly on an academic topic, and/or general writing skills.
English language requirements of the Graduate School.
GRE scores
Other relevant information that would assist the Admissions Committee in selecting applicants to the program.
The program of study is designed primarily for the student who seeks the Ph.D. degree. However, those interested in a terminal master’s degree will be considered for admission on a case-by-case basis. All Ph.D. candidates entering with a B.A./B.S. must complete requirements for the M.S. degree.
Requirements for the Master of Science Degree:
Students who seek only the Master of Science Degree must complete 24 hours of coursework which include the following four required courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENDY 6013</td>
<td>Environmental Dynamics</td>
<td>3</td>
</tr>
<tr>
<td>ENDY 5053</td>
<td>Quaternary Environments</td>
<td>3</td>
</tr>
<tr>
<td>ENDY 5113</td>
<td>Global Change</td>
<td>3</td>
</tr>
<tr>
<td>ENDY 6033</td>
<td>Society and Environment</td>
<td>3</td>
</tr>
</tbody>
</table>

In addition, student must complete 6 hours of ENDY 600V (Thesis hours) and submit a research thesis or take a total of 36 hours for a non-thesis MS.

Program Costs
There will be no additional costs to create or maintain this program.

Library Resources
The library resources currently available for the Ph.D. program will be sufficient for the M.S. program.

Instructional Facilities
The courses required by the program are already being taught.

Faculty Resources
We should not need additional faculty resources to accommodate the program.

### Program Goals and Objectives

Program is needed for students who may wish to secure employment with State or Federal agencies to protect our population and environment. They will also be important to companies as environmental awareness increases.

### Learning Outcomes

Students will have the same interdisciplinary background as those who pursue the Ph.D. but will be have a more general focus so they will be prepared to tackle the complex problems facing companies, cities and government.
### Description of request
We are adding a M.S. to the Environment Dynamics Ph.D. program to add flexibility for students and add a strong foundation for interdisciplinary research for those who wish to terminate at the masters level.

### Justification for request
As environmental concerns increase we need more and more individuals who are capable of addressing and solving the complex problems arising in the environment and within built environments. Adding the M.S. will give us more flexibility and allow us to train more individuals who will be capable of addressing these challenges at local, regional and state levels.
